INTRODUCTION

The purpose of this circular is to give you the notices of the EGM, H Share Class Meeting and Existing Preference Share Class Meeting and provide you (among other things) with additional information to enable you to make informed decisions on whether to vote for or against the proposals to be proposed at the EGM, the H Share Class Meeting and the Existing Preference Share Class Meeting as follows:

1. Proposal in respect of the Plan of the Non-Public Issuance of the Offshore Preference Shares by China Minsheng Banking Corp., Ltd.

References are made to the announcements of the Company dated 14 December 2016 and 30 October 2018 in relation to (among others) the issuance of the Existing Preference Shares and the Offshore Preference Shares, respectively.

In order to improve the capital structure of the Company, provide capital support for effective implementation of the corporate strategy, increase the level of capital adequacy ratio and enhance the sustainable development of the Company, the Company proposed to issue the Offshore Preference Shares in a non-public method to replenish additional tier-1 capital. For details of the Proposal in respect of the Plan of the Non-Public Issuance of the Offshore Preference Shares by China Minsheng Banking Corp., Ltd., please see Appendix I to this circular. The Offshore Preference Shares will not be issued to connected persons of the Company. If the Offshore Preference Shares are to be issued to any connected person of the Company, the Company will comply with the relevant requirements under Chapter 14A of the Hong Kong Listing Rules, including but not limited to independent Shareholders' approval.

The average trading price of the ordinary H Shares of the Company in 20 trading days preceding the announcement date (i.e. 30 October 2018) of the Board resolution on the relevant issuance proposal = the total trading amount of the Company's ordinary H Shares in these 20 trading days/the total trading volume of the Company's ordinary H Shares in these 20 trading days, i.e. HK\$5.57 per Share, which is equivalent to RMB4.9287259 per Share (based on an exchange rate of RMB0.88487 to

LETTER FROM THE BOARD

HK\$1.00, being the central parity rate of Hong Kong Dollars to RMB published by the People's Bank of China on the trading day immediately preceding the announcement date of the Board resolution in respect of the issuance plan of the Offshore Preference Shares)).

The conversion price of HK\$5.57 represents:

- (a) a discount of approximately 2.28% to the closing price of HK\$5.70 per Share as quoted on the Hong Kong Stock Exchange on 30 October 2018, being the date of the Board meeting approving the issuance of the Offshore Preference Shares;
- (b) a discount of approximately 1.24% to the average closing price of approximately HK\$5.64 per Share as quoted on the Hong Kong Stock Exchange for the last five consecutive trading days up to and including 30 October 2018, being the date of the Board meeting approving the issuance of Offshore Preference Shares;
- (c) a discount of approximately 4.79% to the closing price of HK\$5.85 per Share as quoted on the Hong Kong Stock Exchange on 25 January 2019, being the Latest Practicable Date; and
- (d) a discount of approximately 46.88% to the Group's unaudited net asset value of RMB8.84 (equivalent to HK\$10.49 based on an exchange rate of RMB0.84310 to HK\$1.00, being the central parity rate of Hong Kong Dollars to RMB published by the People's Bank of China on 29 June 2018) as at 30 June 2018.

The issuance of the Offshore Preference Shares is subject to various conditions, which include, among other things, the Shareholders' approval, the approvals from the CBIRC and the CSRC and the granting of listing approval by the Hong Kong Stock Exchange, as well as multiple factors including market conditions. As of the Latest Practicable Date, this proposal has been considered and approved at the meeting of the Board held on 30 October 2018 and is now submitted as a special resolution for consideration and approval at the EGM and the Class Meetings. Upon approval by the EGM and the Class Meetings, the Company shall also seek to obtain the approvals from the CBIRC and the CSRC and the granting of listing approval by the Hong Kong Stock Exchange.

Assuming that the issuance of the Offshore Preference Shares of a total amount of RMB20 billion (without taking into account of any issuance of the Domestic Preference Shares) and all of such Offshore Preference Shares being converted, and based on the initial mandatory conversion price of the abovementioned non-public issuance of the Offshore Preference Shares (being HK\$5.57 per Share), the maximum number of new ordinary H Shares which can be issued upon the full exercise of the conversion right of the Offshore Preference Shares will not exceed approximately 4,057,843,833 shares. Assuming that there is no change in the Company's issued share capital after the Latest Practicable Date and immediately before the completion of the issuance of the Offshore Preference Shares, the maximum number of new ordinary H Shares which can be issued upon the exercise of the conversion right of the Offshore Preference Shares will represent: (i) 48.77% of the total issued H ordinary Shares and 9.27% of the total issued share capital of the Company, respectively, before the issuance and full conversion of the Offshore Preference Shares; and (ii) 32.78% of the total issued H ordinary Shares and 8.48% of the total issued share capital of the Company, respectively, after the issuance and full conversion of the Offshore Preference Shares.

LETTER FROM THE BOARD

For the impact on the shareholding structure of the Company upon completion of issuance and full conversion of the Offshore Preference Shares, please refer to the table set out in the section headed “IMPACT OF THE NON-PUBLIC ISSUANCE OF THE PREFERENCE SHARES ON THE CAPITAL STRUCTURE OF THE COMPANY” in this circular.

As at 30 September 2018, the Company’s core tier-1 capital adequacy ratio was 8.77%.

The Directors of the Company are of the opinion that the terms of the non-public issuance of the Offshore Preference Shares are fair and reasonable and in the interests of the Company and its Shareholders as a whole. The proposal was approved at the meeting of the Board on 30 October 2018 and is hereby proposed at the EGM, A Share Class Meeting, H Share Class Meeting and Existing Preference Share Class Meeting, respectively, of the Company for approval of the following Plan of Non-public Issuance of the Offshore Preference Shares by way of special resolution. unchanged during the term of the Offshore Preference Shares, or there will be coupon rate adjustment periods and the coupon rate will be fixed for a certain period after the issuance of the Offshore Preference Shares and will be readjusted once after each specified period thereafter (Such coupon rate will be the sum of the benchmark rate and the fixed spread. The cancellation of any dividend payment to the holders of the Offshore Preference Shares will only constitute a restriction on the payment of dividend to the holders of Ordinary Shares, and will not lead to any other restrictions on the Company. The Company will fully consider the rights and interests of the holders of the preference shares when exercising the above-mentioned rights.

3. Method of dividend payment

Dividends for the Offshore Preference Shares will be payable in cash calculated based on the aggregate par value of the relevant tranche of the Offshore Preference Shares issued and outstanding, being the product of the issue price denominated in foreign currency of the Offshore Preference Shares and the total number of the Offshore Preference Shares of the relevant tranche issued and outstanding during the period (which shall be similarly construed hereinafter). Dividends for the Offshore Preference Shares shall be paid annually and denominated and declared in RMB and paid

The specific arrangements for the redemption rights shall be determined by the Board of the Company in accordance with the authorization of the Shareholders' general meeting.

(VIII) MANDATORY CONVERSION PROVISIONS

When the conditions for mandatory conversion are met, the issued and outstanding Offshore Preference Shares, subject to regulatory approvals, shall be wholly or partially converted into ordinary H Shares.

1. Conditions for mandatory conversion

- (1) Upon the occurrence of trigger event of additional tier-1 capital instruments meaning the core tier-1 capital adequacy ratio of the Company decreases to 5.125% or below, the issued and outstanding Offshore Preference Shares shall be wholly or partially converted into ordinary H Shares according to the total amount in order to restore the Company's core tier-1 capital adequacy ratio to above 5.125% without the prior consent of the holders of preference shares. In the case of partial conversion, all the Offshore Preference Shares under the issuance shall be converted on a pro rata basis on the same conditions. The Offshore Preference Shares shall not be converted back into preference shares under any conditions after the conversion to ordinary H Shares.
- (2) Upon the occurrence of trigger event of tier-2 capital instruments, the issued and outstanding Offshore Preference Shares shall be wholly converted into ordinary H Shares according to the total amount without the prior consent of the holders of preference shares. The Offshore Preference Shares shall not be converted back into preference shares under any conditions after the conversion to ordinary H Shares. The trigger event of tier-2 capital instruments shall be regarded as the occurrence of the earlier of the following two situations: (i) the CBIRC is of the view that the Company can no longer sustain itself if the preference shares are not converted or written-down; (ii) relevant authorities are of the view that the Company can no longer sustain itself without capital injections from the public sector or any support to the same effect.

When the above conditions of mandatory conversion are met, the Company shall report to the CBIRC for review and approval, and perform its obligations of information disclosure pursuant to the relevant regulations, such as publishing provisional reports and announcements.

2. Mandatory conversion amount and its basis

For the mandatory conversion of the Offshore Preference Shares, the formula for determining the number of shares to be converted shall be: $Q^* = V^*/P^* \times \text{exchange rate for calculation}$. Any remaining preference shares held by a holder of the Offshore Preference Shares that can only be converted into less than one full ordinary H Share shall be handled by the Company in accordance with relevant regulatory rules.

APPENDIX I PROPOSAL IN RESPECT OF THE PLAN OF THE NON-PUBLIC ISSUANCE OF THE OFFSHORE PREFERENCE SHARES OF CHINA MINSHENG BANKING CORP., LTD.

Of which: Q^* denotes the number of ordinary H shares that shall be converted from the Offshore Preference Shares held by each holder of the Offshore Preference Shares; V^* denotes the value of the Offshore Preference Shares held by each holder of the Offshore Preference Shares for the mandatory conversion as determined under the principle that the losses will be absorbed in equal proportion among the Domestic Preference Shares and the Offshore Preference Shares; P^* denotes the mandatory conversion price of the Offshore Preference Shares under the issuance; and the exchange rate for calculation denotes the cross rate between Hong Kong dollar and the foreign currency in which the Offshore Preference Shares are denominated based on the RMB Central Parity Rate published by the China Foreign Exchange Trade System on the trading date immediately preceding the date of announcement of the Board resolution in respect of the issuance plan of the Offshore Preference Shares.

Upon the occurrence of the trigger event, the issued and outstanding Offshore Preference Shares shall be fully or partially (under the principle that the losses will be absorbed in equal proportion) converted to ordinary H Shares based on the above formula.

The Company proposed to authorize the Board with full power to deal with all the relevant matters of the conversion of the Offshore Preference Shares at the Shareholders' general meetings if conditions for mandatory conversion are met.

3. Mandatory conversion price and its basis

The initial mandatory conversion price of the Offshore Preference Shares shall be the average trading price of the ordinary H Shares of the Company in 20 trading days preceding the announcement date of the Board resolution on the relevant issuance proposal. The specific matters shall be determined by the Board as authorized by the Shareholders' general meeting (with a delegated mandate) according to market conditions.

The average trading price of the ordinary H Shares of the Company in 20 trading days preceding the announcement date of the Board resolution on the relevant issuance proposal = the total trading amount of the Company's ordinary H Shares in these 20 trading days/the total trading volume of the Company's ordinary H Shares in these 20 trading days (i.e. HK\$5.57¹ per Share).

4. Mandatory conversion period

The period for mandatory conversion of the Offshore Preference Shares commences on the first trading day immediately following the completion date of issuance of the Offshore Preference Shares and ends on the date of redemption or conversion of all the Offshore Preference Shares.

5. Method of adjustments of the mandatory conversion price

Upon the occurrence of certain prescribed events relating to the ordinary H Shares of the Company (e.g. bonus issuance, capital conversion or increase, issuance of new shares at a price lower than the market price (excluding any increase in the share capital as a result of conversion of certain financial instruments issued by the Company that are convertible into Ordinary Shares) and placement) after the date of passing the Board resolution in respect of the issuance plan of the Offshore Preference Shares, the mandatory conversion price shall be subject to cumulative

¹ equivalent to RMB4.9287259 per Share (based on an exchange rate of RMB0.88487 to HK\$1.00, being the central parity rate of Hong Kong Dollars to RMB published by the People's Bank of China on the trading day immediately preceding the announcement date of the Board resolution in respect of the issuance plan of the Offshore Preference Shares).

APPENDIX I PROPOSAL IN RESPECT OF THE PLAN OF THE NON-PUBLIC ISSUANCE OF THE OFFSHORE PREFERENCE SHARES OF CHINA MINSHENG BANKING CORP., LTD.

adjustments in the same order of the occurrence of such events. The distribution of cash dividends to the holders of Ordinary Shares of the Company will not result in any adjustment to the mandatory conversion price. The mandatory conversion price will be adjusted based on the following:

Bonus issuance or capital conversion or increase: $P1^* = P0^* \times N^* / (N^* + n^*)$;

Issuance of new H Shares at a price lower than the market price or placement: $P1^* = P0^* \times (N^* + k^*) / (N^* + n^*)$; $k^* = n^* \times A^* / M^*$;

In the above formulae, “P0*” denotes the effective mandatory conversion price before adjustment; “N*” denotes the total ordinary H share capital of the Company before the bonus issuance for ordinary H Shares, capital conversion or increase, issuance of new shares or placement; “n*” denotes the number of new shares as a result of the bonus issuance for ordinary H Shares, capital conversion or increase, issuance of new shares or placement; “A*” denotes the price for the issuance of the new H Shares or placement; “M*” denotes the closing price of ordinary H Shares on the trading date immediately preceding the date of announcement of issuance or placement of new H Shares (i.e. announcement containing the effective and irrevocable terms of issuance or placement of new H Shares); and “P1*” denotes the effective mandatory conversion price after adjustment.

In the event that the rights and benefits of the holders of the Offshore Preference Shares may be affected by the change in the class and number of Shares and Shareholders’ interests of the Company due to the cancellation of any repurchased shares by, or merger or division of the Company or any other circumstances, the Company will, for the purpose of anti-dilution, adjust the mandatory conversion price based on the actual circumstances and in accordance with the principles of fairness, justice, equity and full protection and balance of the interests of the holders of preference shares and the holders of Ordinary Shares. The adjustment mechanism for the mandatory conversion price in those circumstances will be determined in accordance with the relevant regulations.

6. Entitlement to dividends of Ordinary Shares in the year of mandatory conversion

The new ordinary H Shares to be issued as a result of the mandatory conversion of the Offshore Preference Shares will rank pari passu with the existing ordinary H Shares, and all holders of Ordinary Shares whose names appear on the register of members of the Company on the record date for dividend entitlement of Ordinary Shares shall be entitled to receive the dividend for the current dividend period.

(IX) RESTRICTION ON AND RESTORATION OF VOTING RIGHTS

1. Restriction on voting rights

Under normal circumstances, the holders of preference shares shall have no right to convene, attend or vote at any Shareholders’ general meetings. The holders of preference shares will be entitled to attend Shareholders’ general meetings and vote at a separate class meeting if the resolutions to be passed relate to any of the followings and each preference share will be entitled to one vote, except for the preference shares held by the Company which shall have no right to vote:

- (1) amendments to the provisions of the Articles of Association in relation to preference shares;

**APPENDIX I PROPOSAL IN RESPECT OF THE PLAN OF THE NON-PUBLIC
ISSUANCE OF THE OFFSHORE PREFERENCE SHARES
OF CHINA MINSHENG BANKING CORP., LTD.**

- (2) decrease in the registered capital of the Company by more than 10% on one occasion or in aggregate;
- (3) merger, division, dissolution or change in form of incorporation of the Company;
- (4) issuance of preference shares by the Company;
- (5) other circumstances specified by laws, administrative regulations, departmental rules, any securities regulatory authorities of the listing places of Shares of the Company or the Articles of Association of the Company.

Any resolutions on the foregoing matters shall be adopted by more than two thirds (2/3) of the voting rights of the holders of Ordinary Shares present at the meeting (including the holders of preference shares whose voting rights have been restored) and by more than two thirds (2/3) of the voting rights of the holders of preference shares present at the meeting (excluding the holders of preference shares whose voting rights have been restored).

2. Restoration of voting rights

If there are outstanding Offshore Preference Shares and the Company fails to pay dividends on preference shares for a total of three financial years or for two consecutive financial years, holders of the Offshore Preference Shares shall have the right to attend Shareholders' general meetings and vote with holders of Ordinary Shares from the day following the date on which the Shareholders' general meeting resolves not to distribute the agreed dividends on preference shares for that year.

The formula for calculating the voting rights of Ordinary Shares of the Offshore Preference Shares with voting rights restored is as follow:

$R^* = W^*/S^* \times \text{exchange rate for calculation}$. Any fractional voting right restored will be rounded down to the nearest whole number.

In the above formula: "R*" denotes the voting right of ordinary H Shares that can be restored from the Offshore Preference Shares for each holder of the Offshore Preference Shares; "W*" denotes the amount of the Offshore Preference Shares held by each holder of the Offshore Preference Shares; "S*", the price for calculation, denotes the average trading price of ordinary H Shares of the Company for the 20 trading days preceding the date of announcement of the Board resolution in respect of the issuance plan of the Offshore Preference Shares; and the "exchange rate for calculation" denotes the cross rate between Hong Kong dollar and the foreign currency in which the Offshore Preference Shares are denominated based on the RMB Central Parity Rate published by the China Foreign Exchange Trade System on the trading date immediately preceding the date of announcement of the Board resolution in respect of the issuance plan of the Offshore Preference Shares.

Average trading price of ordinary H Shares of the Company for the 20 preceding trading days = total trading amount of ordinary H Shares of the Company for such 20 preceding trading days/total trading volume of ordinary H Shares for the same 20 trading days, i.e. HKD5.57 per share.

**APPENDIX I PROPOSAL IN RESPECT OF THE PLAN OF THE NON-PUBLIC
ISSUANCE OF THE OFFSHORE PREFERENCE SHARES
OF CHINA MINSHENG BANKING CORP., LTD.**

Upon the occurrence of certain prescribed events relating to the ordinary H Shares of the Company (e.g. bonus issuance, capital conversion or increase, issuance of new Shares at a price lower than the market price (excluding any increase in the share capital as a result of conversion of certain financial instruments, such as preference shares and convertible corporate bonds, issued by the Company that are convertible into Ordinary Shares) and placement) after the issuance of the preference shares, the simulated conversion price shall be subject to cumulative adjustments in the same order of the occurrence of such events. The adjustment method is the same as that applicable to the mandatory conversion price as specified in “VIII. Mandatory Conversion Provisions”.

3. Cancellation of restoration of voting rights

After the voting rights are restored, upon the full payment of the dividend to the Offshore Preference Shares for the current dividend period, the voting rights granted to holders of the Offshore Preference Shares in accordance with the terms of restoration of voting rights will be terminated commencing on the date of full payment of such dividend. After such cancellation, if the terms for the restoration of voting rights are triggered again, the holders of the Offshore Preference Shares may be re-granted with voting rights.

(X) ORDER OF DISTRIBUTION AND BASIS FOR LIQUIDATION

Holders of the Offshore Preference Shares will be subordinated to the depositors, ordinary creditors, holders of subordinated debt, holders of convertible bonds, holders of tier-2 capital bonds and holders of additional tier-2 capital instrument in terms of distribution of remaining assets, but will rank ahead of the holders of Ordinary Shares of the Company.

Upon liquidation, the residual assets of the Company after liquidation will be distributed in the following order:

1. liquidation expenses;
2. employee salary, labor insurance premiums and statutory compensatory amount;
3. principal and interest of individual deposits;
4. outstanding taxes;
5. debts of the Company;
6. after distribution of residual assets to the foregoing items, the remaining assets of the Company will be distributed to the Shareholders in proportion to their respective class of shares and corresponding shareholdings. Holders of the Offshore Preference Shares will rank *pari passu* with the holders of preference shares issued and outstanding and holders of preference shares which may be issued by the Company in the future in terms of distribution of remaining assets, and all such holders of preference shares will rank ahead of the holders of Ordinary Shares. The holders of the Offshore Preference Shares will be entitled to an amount equal to the aggregate value of the Offshore Preference Shares issued and outstanding plus any declared but unpaid dividends. If there are insufficient remaining assets, the distribution will be made on a *pro rata* basis to the holders of the Offshore Preference Shares and Domestic Preference Shares then issued and outstanding.

**APPENDIX I PROPOSAL IN RESPECT OF THE PLAN OF THE NON-PUBLIC
ISSUANCE OF THE OFFSHORE PREFERENCE SHARES
OF CHINA MINSHENG BANKING CORP., LTD.**

(XI) USE OF PROCEEDS

Subject to the approval of the CBIRC, the proceeds from the issuance of the Offshore Preference Shares, after deducting the issuing expenses, will be used for replenishment of the additional tier-1 capital of the Company.

(XII) RATING

For the purposes of adapting to complex domestic and overseas economic and financial conditions, implementing regulatory requirements, further strengthening the capital management, enhancing the leading role of capital in business development, and promoting sustainable and healthy development of businesses, the Company has formulated the “Capital Management Plan for 2018 to 2020 of China Minsheng Banking Corp., Ltd.” pursuant to relevant regulatory requirements and the development strategies and business plans of the Company.

I. BASIC PRINCIPLES OF CAPITAL PLAN

(1) Meet regulatory requirements

Pursuant to the requirements of “the Capital Rules for Commercial Banks (Provisional)” (the “**Capital Measures**”), the core tier-1 capital adequacy ratio, tier-1 capital adequacy ratio and capital adequacy ratio of commercial banks should be not less than 7.5%, 8.5% and 10.5% respectively, and the Company’s capital adequacy ratios at all levels shall continue to meet the minimum regulatory requirements.

(2) Maintain a reasonable and stable level of capital adequacy ratio

On the basis of compliance with capital adequacy ratio requirements, certain safety margin and buffer shall also be set for the capital adequacy ratio of the Company to maintain a reasonable and stable level of capital adequacy ratio. Such measure shall prevent the occurrence of accidents which will cause the capital adequacy ratio to be reduced to the one below the regulatory policies requirements and meet the temporary capital needs. In addition, such measure shall avoid idle capital resources due to significant fluctuations in capital adequacy ratio, affecting the capital utilization efficiency.

(3) Balance the Company’s development needs and Shareholders’ return requirements

On the basis of meeting capital adequacy ratio to a reasonable level, the Company shall focus on balancing the relationship between capital adequacy and capital return, balancing the Company’s development needs with Shareholders’ return requirements, strengthening refined capital management, continuously improving capital utilization efficiency and improving the level of capital return.

II. CONSIDERATIONS OF CAPITAL PLAN

(1) Complex domestic and overseas economic conditions

Currently, the global economy has picked up its recovery momentum steadily and the global financial and economic landscape become more complex with various challenges and uncertainties. Monetary policies of major developed countries further tighten while emerging markets are facing the pressure of capital outflow. Trade protectionism is on the rise, and trade conflicts among the economies has escalated.

The economy of China maintains its steady growth in spite of the changing external environment. The economic structure adjustment has been further promoted through the replacement of old driving trains with new ones for higher quality and efficiency, leading China towards high quality development. However, China is also experiencing weakened internal demand, relatively high leverage ratio of real economy and tightened financial regulation for risk prevention and control. With increasing uncertainties in the future economy resulting from the Sino-American trade war, national macro-control, deleveraging and other factors, business profitability and asset quality of enterprises will be adversely impacted and affected.

In light of the above, the Company has made reasonable planning for the growth and profit retention of its business for the next three years, and on this basis, estimated the capital demand and the availability of internal capital.

(2) Ensure adequate capital level to cope with substantive risks of the Company in the planning period

Following the increasingly stringent regulation and control, the society's capability of generating credits has been weakened. The development of banking industry also faces various challenges, such as slow growth in deposits, increasing difficulties in growing stable liabilities with low cost, increasing demand for conversion of off-balance sheet items into balance sheet items and non-standardized items into standardized items, more complicated liquidity management and intensifying pressure on capital replenishment. The Company conducts a prudent assessment of the risk status and management level of the Company through continuous internal capital adequacy assessment procedures, to ensure that the capital adequacy level in the planning period covers all substantive risks of the Company and is in line with our business conditions, risk management level and risk changes. On this basis, the Company shall further promote optimization and upgrade of the capital management models and methods.

(3) With increasingly tightened domestic and overseas supervision requirements, actively carry out multi-channel external financing

After the financial crisis, domestic and overseas regulatory authorities have increasingly tightened the requirements for capital adequacy ratio of commercial banks, and the requirements for capital adequacy level in the macro prudential supervision system have been further raised. In the future, commercial banks will face rising capital demand. The Company needs to reserve adequate capital buffer to satisfy potential additional capital requirements as a result of stricter regulations in the future, capital buffer required by rating agencies according to the regulatory minimum requirement and other factors. During the planning period, the Company will strengthen the feasibility study of innovative capital instruments on the basis of capital replenishment from internal sources, taking into account various factors such as capital demand, market financing window, etc., and actively expand external financing channels and gradually enhance the capital strength and level of capital adequacy ratio of the Company.

III. TARGETS FOR PLANNING OF CAPITAL ADEQUACY RATIO

(1) Capital measurement methods

The plan calculates the capital adequacy ratio pursuant to the requirements of the Capital Measures, using the weight method for credit risk, the standard method for market risk, and the basic index method for operational risk.

(2) Targets for planning of capital adequacy ratio

Aiming to ensure compliance with regulatory requirements, continuously improve its capital's ability to resist risks and enhance the return on its capital, on the basis of comprehensive analysis of changes in domestic and overseas macroeconomic conditions, regulatory requirements and the Company's strategic transformation, the capital adequacy ratio objectives of the Company are planned as: core tier-1 capital adequacy ratio of no less than 8.5%, tier-1 capital adequacy ratio of no less than 9.5% and capital adequacy ratio of no less than 11.5% as of 2020.

If there are significant changes in economic and financial conditions or adjustments to regulatory standards in the future, the Company will accordingly adjust the targets for planning of capital adequacy ratios at different levels.

IV. CAPITAL REPLENISHMENT PLAN

The Company will continue to replenish its capital mainly with internal sources and, to a lesser extent, external financing for the next three years, and proactively innovate capital instruments, broaden capital replenishment channels and continuously optimize the capital structure.

(1) Replenishment from internal sources

During the planning period, the Company will replenish the capital primarily through profit retention in order to continuously maintain adequate level of capital. The Company will further optimize business structure and operation model, continue to refine asset structure, increase value creation, improve profitability and the level of capital return, and enhance the capital self-accumulation ability, in order to ensure sustainable capital replenishment from internal sources.

(2) Replenishment from external sources

Apart from replenishment from internal sources, the Company intends to replenish its capital from the external sources by the following measures for the purpose of accomplishing the targets of the capital plan for 2018 to 2020:

1. Pursuant to the regulatory requirements and market condition, the Company will replenish tier-2 capital through the issuance of tier-2 capital bonds or any other capital instruments, to establish a diversified capital replenishment mechanism.
2. Pursuant to the regulatory requirements and market condition, the Company will replenish additional tier-1 capital through the issuance of preference shares, non-fixed term capital bonds and other capital instruments to increase the proportion of tier-1 capital to the total capital in order to enhance the loss absorbing ability of capital.

3. The Company will use equity financing methods when opportunity arises to replenish its core tier-1 capital pursuant to the regulatory requirements and market conditions.
4. The Company will accord high priority to the market dynamics. Depending on its own development needs, the Company will use other capital replenishment methods at appropriate time to raise the level of capital adequacy.

V. CAPITAL MANAGEMENT MEASURES

(1) Enhance capital budget management to implement the targets for capital plan

In the next three years, the Company will include the annual capital adequacy ratio objectives into the annual budget system, asset liability management policy and risk appetite with capital plan as the agenda, to achieve effective transmission of capital adequacy ratio objectives from capital plan to capital budget, capital allocation and assessment. The Company will also strengthen capital monitoring and early warning mechanism to ensure that the capital adequacy ratio of the Company meets regulatory requirements and the target of capital plan.

(2) Promote the “light capital” development model and steadily enhance the capital efficiency and capital return

The Company shall proactively promote the “light capital” development model, coordinate the capital strength and asset size, balance capital adequacy and capital return. Firstly, with effective capital management measures, the Company will reasonably allocate capital resources to support the development of its key strategic businesses. Secondly, the Company will proactively adjust and optimize its businesses, promote the capital-conserving development model, give priority to using limited capital resources in asset businesses with high comprehensive income and low capital consumption. The Company will apply capital constraints into the entire business management process, including marketing, product pricing, resource allocation, performance evaluation, etc., to further raise the capital efficiency and facilitate the balance among capital, revenue and risk of the Company.

(3) Improve internal economic capital management system to enhance capital contingency management

The Company will improve the economic capital management system with stricter capital measurement standards to further enhance the sensitivity of economic capital measurement towards risks and consolidate refined capital management. In addition, the Company will strengthen the monitoring of early warning indicators for capital. In response to challenges from capital constraints, the Company will timely formulate the capital contingency plan to meet unplanned capital needs. The Company will define the corresponding policy arrangements and response measures for capital replenishment to ensure that the Company will have adequate capital to cope with challenges arising from external changes.

In the case of partial conversion, all Domestic Preference Shares shall be converted on a pro rata basis on the same conditions. Ordinary A Shares converted from preference shares shall not be re-converted into preference shares in any circumstances.

- (2) All Domestic Preference Shares shall be converted into ordinary A Shares upon the occurrence of the earlier of the following two situations: ① the CBRC is of the view that the Company can no longer be viable if the preference shares are not converted; ② the relevant authorities are of the view that the Company can no longer be viable without capital injections from the public sector or any support of the same effect.

The initial conversion price of the Domestic Preference Shares shall be the average trading price³ of the ordinary A Shares of the Company in 20 trading days preceding the date of the Board resolution announcement on the issuance plan (i.e. RMB7.33 per Share).

After the Board has resolved to approve the issuance of the Domestic Preference Shares, whenever the capital of the Company is changed due to the issue of bonus shares, capitalization issue, issue of new shares at a price lower than the market price or rights issue (other than the issue of new shares upon conversion of convertible instruments issued by the Company), the Company shall adjust the conversion price according to the sequence of occurrence of the above events by using the following formulas:

For issue of new shares at a price lower than the market price or rights issue: $P1 = P0 \times (N + k) / (N + n)$; $k = n \times A / M$;

³ The average trading price of the ordinary A Shares of the Company in 20 trading days preceding the date of the Board resolution announcement = the total trading amount of the Company’s ordinary A Shares in the 20 trading days preceding the date of the Board resolution announcement ÷ the total trading volume of the Company’s ordinary A Shares in the 20 trading days preceding the date of the Board resolution announcement. Reference is made to the announcement of the Company dated 27 July 2018 in relation to, among others, adjustment on the conversion price of the Domestic Preference Shares. The conversion price of the Domestic Preference Shares has been adjusted from RMB8.79 per A Share to RMB7.33 per A Share due to the conversion of capital reserve into share capital.

Where: “P0” is the mandatory conversion price effective before adjustment; “N” is the total ordinary share capital of the Bank before the issue of bonus shares, capitalization issue, issue of new shares or rights issue; “n” is the number of ordinary shares created under the issue of bonus shares, capitalization issue, issue of new shares or rights issue; “A” is the issue price of new shares or rights issue; “M” is the closing price of ordinary A Shares on the trading day preceding the date of the announcement (announcement of the terms of valid and irrevocable issue of new shares or rights issue) of the issue of new shares or rights issue; “P1” is the mandatory conversion price effective after adjustment.

When the above changes in the Company’s Ordinary Shares occur, the Company will adjust the mandatory conversion price accordingly and disclose the relevant information in accordance with the relevant requirements.

If there are changes to the class, number of shares and/or the rights and benefits of shareholders of the Company that may affect the interests of the Domestic Preference Shareholders due to share repurchase, merger, division or other transactions, the Company, for anti-dilution purpose, may adjust the conversion price based on the actual circumstances and in accordance with the principles of fairness, justice, equity and balance of the interests of the Domestic Preference Shareholders and ordinary Shareholders. The adjustment of conversion price and measures shall be determined in accordance with the laws, regulations and relevant requirements of regulatory authorities.

The mandatory conversion price of the Domestic Preference Shares will not be adjusted for the distribution of cash dividends on Ordinary Shares by the Company.

4. Attribution of dividends on Ordinary Shares in the year of mandatory conversion

Any additional ordinary A Shares of the Company resulting from the conversion of the Domestic Preference Shares shall rank pari passu with the Company’s existing ordinary A Shares. All ordinary Shareholders registered on the Share register of the Company on the record date for any dividend distribution (including any holders of ordinary A Shares converted from the Domestic Preference Shares) shall be entitled to dividend distributions on Ordinary Shares for the period and shall equally enjoy all the interests of ordinary Shareholders.

Any resolutions on the foregoing matters shall be adopted by more than two thirds (2/3) of the voting rights of the ordinary Shareholders present at the meeting (including the Preference Shareholders whose voting rights have been restored) and by more than two thirds (2/3) of the voting rights of the Preference Shareholders present at the meeting (excluding the Preference Shareholders whose voting rights have been restored).

2. Restoration of voting rights

If there are outstanding Domestic Preference Shares and the Company fails to pay dividends on preference shares for a total of three financial years or for two consecutive financial years, Preference Shareholders shall have the right to attend shareholders' general meetings and vote with ordinary Shareholders from the day following the date on which the shareholders' general meeting resolves not to distribute the agreed dividends on preference shares for that year.

The number of voting rights to be restored from preference shares shall be calculated by using the formula: $Q = V/P$. The number of voting rights shall be rounded down to the nearest integer.

Where: "V" is the total nominal value of the preference shares for which the voting rights shall be restored; "P" is the average trading price⁴ of the ordinary A Shares of the Company for the 20 trading days preceding the date of the Board resolution announcement on the issuance plan of preference shares (i.e. RMB7.33 per Share).

⁴ Reference is made to the announcement of the Company dated 27 July 2018 in relation to, among others, adjustment on the conversion price of the Domestic Preference Shares. The conversion price of the Domestic Preference Shares has been adjusted from RMB8.79 per A Share to RMB7.33 per A Share due to the conversion of capital reserve into share capital.

After the Board has resolved to the issuance of preference shares, whenever the capital of the Company is changed due to the issue of bonus shares, capitalization issue, issue of new shares at a price lower than the market price or rights issue (other than the issue of new shares upon conversion of convertible instruments issued by the Company into ordinary shares), the Company shall adjust the implied conversion price upon restoration of voting rights according to the sequence of occurrence of the above events by using the following formulas:

For issue of bonus shares or capitalization issue: $P1 = P0 \times N / (N + n)$;

For issue of new shares at a price lower than the market price or rights issue: $P1 = P0 \times (N + k) / (N + n)$; $k = n \times A / M$;

Where: “P0” is the conversion price effective before adjustment; “N” is the total ordinary share capital of the Bank before the issue of bonus shares, capitalization issue, issue of new shares or rights issue; “n” is the number of shares created under the issue of bonus shares, capitalization issue, issue of new shares or rights issue; “A” is the issue price of new shares or rights issue; “M” is the closing price of ordinary A Shares on the trading day preceding the date of the announcement (announcement of the terms of valid and irrevocable issue of new shares or rights issue) of the issue of new shares or rights issue; “P1” is the conversion price effective after adjustment.

When the above changes in the Company’s Ordinary Shares occur, the Company will adjust the implied conversion price upon restoration of voting rights and disclose the relevant information in accordance with the relevant requirements.

If there are changes in the share and the interests of shareholders of the Company that may affect the interests of Preference Shareholders due to share repurchase, merger, division or other transactions, the Company shall, for the purpose of anti-dilution, adjust the implied conversion price upon restoration of voting rights based on the actual circumstances and in accordance with the principles of fairness, justice, equity and balance of interests of the Preference Shareholders and ordinary Shareholders. The adjustment for the implied conversion price and measures shall be determined in accordance with the laws and regulations and relevant requirements of regulatory authorities.

The implied conversion price of the Domestic Preference Shares upon restoration of voting rights will not be adjusted according to the Company’s distribution of cash dividends on Ordinary Shares.

3. Cancellation of restoration of voting rights

The voting rights shall be restored until the date on which all dividends for the preference shares due for the current year are paid.

X. Order of distribution of residual assets and basis for liquidation

The Domestic Preference Shareholders will be subordinated to the depositors, general creditors, holders of subordinated debts (including but not limited to subordinated debts, mixed capital bonds and tier-2 capital instruments) of the Company in respect of distribution of residual assets, but will rank ahead of ordinary Shareholders. All Domestic Preference Shareholders will rank pari passu in respect of distribution of residual assets.

Upon liquidation, the residual assets of the Company will be distributed in the following order:

1. liquidation expenses;
2. employee salary, social insurance premiums and statutory compensation of the Company;
3. principal and interest of individual deposits;
4. tax payable;
5. other debts of the Company;
6. any remaining residual assets of the Company shall be distributed to the Shareholders in proportion to their respective class of shares and corresponding shareholdings.

In the event that the remaining assets are not sufficient to fully settle all payments, they shall be distributed on a pro rata basis among the Domestic Preference Shareholders and Offshore Preference Shareholders.

XI. Use of proceeds

The total proceeds from the Domestic Issuance shall be not more than RMB20 billion. The proceeds will be used to replenish the additional tier-1 capital of the Company in accordance with applicable laws and regulations and with the approval of the regulatory authorities including the CBRC and the CSRC.

XII. Rating

The rating of the Domestic Preference Shares shall be determined in accordance with relevant laws and regulations of the PRC and market conditions the of Domestic Issuance.

XIII. Guarantee

There is no guarantee in relation to the Domestic Preference Shares.

XIV. Transferability

XV. Compliance of latest regulatory requirements

If the regulatory authorities impose new capital requirements or make material changes to the existing capital requirements when there are outstanding preference shares, the Company has the right to modify the terms of the preference shares pursuant to the new regulatory requirements to remain in compliance with the regulatory requirements regarding the eligibility criteria of additional tier-1 capital instruments.

This preliminary plan may be further amended by the Board under the authorization of the shareholders' general meeting on the basis of the advice of the regulatory authorities upon consideration of the Board and approval of the shareholders' general meeting.

XVI. Effective period of the resolution of the non-public issuance of preference shares

The resolution of the issuance shall be valid for 12 months from the date of the resolution of the shareholders' general meeting of the Company.

XVII. Relationship between domestic and offshore issuances

The non-public issuance of Domestic Preference Shares and non-public issuance of offshore preference shares are independent from each other and are not conditional on each other. If either of the issuances fails to obtain the approval of the shareholders' general meeting or the CBRC and/or the CSRC or other competent authorities, the issuance of the other preference shares shall not be affected.
